COURSE TITLE & CODE : DATA SCIENCE (24AD3107) A.Y. 2026 - 2027

Title of the project	Survey data analysis tool	
S. No.	University ID	Name
1	2420030263	Kongari Abhinav
2	2420030276	Aluru Sri Tejaswi Priyank
Name of the Guide		DR.N.SUNANDA

Abstract

The Survey Data Analysis Tool is a data science project developed to analyze and understand survey data. The main aim of this project is to find useful information and patterns from the responses collected from people. The data is first cleaned and analyzed using basic data analysis techniques. Different charts and graphs are used to make the survey results easier to understand. Statistical methods such as hypothesis testing and the chi-square test are also used to check the relationship between different responses. Finally, the analyzed results are displayed using a dashboard, which helps users easily understand the survey findings and make better decisions based on the data.
